5. Feedback on the course

Take-home message

CFU evaluation

6 CFU equals to 150 hours of work.
How I spent my time:

- Lessons: $\sim$ 48 hours
- Study: $\sim$ 50 hours
- Project: 10 weeks, $\sim$ 6/8 hours per week (60 hours)

Good balance between lessons and project, consistent with the CFU assigned.

Feedback on the course

Good points

- Very interesting topics that connect basic C.S. concepts with more advanced and real-world applications.
- I enjoyed the interactions between the students and the professor, especially for flipped classroom lessons.
- It would have been interesting to have more discussion sessions.

Improvements

- I felt a little lost during the project development. It is hard to start from scratch without a clear idea of what are the expectations.

Thank you for your attention!
